In chemistry, a coordination complex consists of a central atom or ion, which is usually metallic and is called the coordination centre, and a surrounding array of bound molecules or ions, that are in turn known as ligands or complexing agents. Many metal-containing compounds, especially those of transition metals, are coordination complexes. A coordination complex whose centre is a metal atom ...

Coordination complex - Wikipedia

The group 11 metals are typically categorised as transition metals given they can form ions with incomplete d-shells. Physically, they have the relatively low melting points and high electronegativity values associated with post-transition metals.

Als Supersäuren werden in der Chemie Säuren bezeichnet, die stärker als konzentrierte (100-prozentige) Schwefelsäure (H_2SO_4 : pK_s-Wert = $\hat{=}$ 3,0) sind.. Alle Supersäuren haben somit einen pK_s-Wert im negativen Bereich. Zur Quantifizierung der Säurestärke wird die Hammettsche Aciditätsfunktion verwendet.. Fluorsulfonsäure (HSO_3F) ist beispielsweise mehrere tausendmal stärker als ...

Det periodiske system er en tabelarrangering af grundstofferne, ordnet efter deres atomnumre (antal protoner), elektronkonfigurationer og gennemgængende kemiske egenskaber. Denne ordning viser periodiske tendenser, såsom elementer med lignende opførsel i samme søjle. Det viser også fire rektangulære blokke med omtrentligt ens kemiske egenskaber. . Generelt gælder det indenfor enhver række ...

Als Metallocene bezeichnet man eine Gruppe von metallorganischen Verbindungen, in denen ein zentrales Metallatom wie in einem Sandwich zwischen zwei Cyclopentadienyl-Liganden (C_5H_5 , Abkürzung: Cp) angeordnet ist. Entsprechend werden Metallocene als Sandwichverbindungen bezeichnet. Die Entdeckung des ersten Metallocens, Ferrocen, das 1951 unabhängig von zwei verschiedenen Forschungsteams ...
