### **System of Equations Calculator - Symbolab**

Section 6-3 : Solving Exponential Equations. Now that we've seen the definitions of exponential and logarithm functions we need to start thinking about how to solve equations involving them.

### **Algebra - Solving Exponential Equations**

A system of linear equations (or linear system) is a collection of linear equations involving the same set of variables. For example,  $x + y = 5$ ,  $x - y = 1$ , and  $2x + 3y = 7$  is a system of three equations in the three variables  $x$ ,  $y$ ,  $z$ . A solution to a linear system is an assignment of numbers to the variables such that all the equations are simultaneously satisfied. A solution to the system above is ...

Page 1 of 2 4.5 Solving Systems Using Inverse Matrices 231 SOLUTION OF A LINEAR SYSTEM Let  $AX = B$  represent a system of linear equations. If the determinant of  $A$  is nonzero, then the linear system has exactly one solution, which is  $X = A^{-1}B$ . Solving a Linear System Use matrices to solve the linear system in Example 1.

In algebra, a quadratic equation (from the Latin quadratus for "square") is any equation having the form  $ax^2 + bx + c = 0$ , where  $x$  represents an unknown, and  $a$ ,  $b$ , and  $c$  represent known numbers, with  $a \neq 0$ . If  $a = 0$ , then the equation is linear, not quadratic. The numbers  $a$ ,  $b$ , and  $c$  are the coefficients of the equation and may be distinguished by calling them, respectively, the quadratic coefficient ...
