Mechanical Properties of Wood

Machining properties of wood: tool wear, cutting force and tensioning of blades is less than counter-sawing. The lowest power consumption was found using a higher overlap between circular sawblades. Finally, experimental and theoretical models to improve circular sawblade dynamic lateral stability were developed.

Machining Properties of Wood - DiVA portal

Wood is one of the most precious materials of the mankind. Since ancient times wood material has been widely used and most of the utensils, shelters and dwellings was made of wood. Wood may have exceptional beauty in all shades of colour and many species have excellent durability withstanding many hundreds of years.
